PROFESSIONAL SUMMARY

Motivated and detail-oriented Information Systems graduate with practical experience in software development, database management, system implementation, and technical support. Adept at analyzing problems, developing efficient solutions, and quickly adapting to new technologies. A collaborative and continuous learner committed to delivering reliable IT solutions and contributing effectively across various areas of information technology.

WORK EXPERIENCE

DEAN IT SERVICES

January 2026 - April 2026

Intern Junior Software Developer

Laurel St, General Santos City

- Developed a Law Office Management System with DOCX article upload functionality
- Help develop the MyLawyerPal SaaS project
- Develop a Python web scraping tool for automated data extraction

PROJECTS

Capstone Project : Payroll with Attendance System using Biometrics & Facial Recognition

May 2025 - December 2025

Programmer

- This system unifies attendance capture, identity validation, and payroll computation into a single operational pipeline for HR and finance teams.
- An enterprise payroll and attendance platform with biometric validation and facial-recognition fallback checks.

ReedGrey Sales and Inventory System

April 2026 - June 2026

Programmer

- The system reduces manual product checking and spreadsheet reconciliation, while giving teams real-time visibility of stock and sales across branches.
- The platform links catalog, stock, and POS flows so inventory movement and sales outcomes stay synchronized per branch without manual reconciliation cycles.

EDUCATION

CRONASIA FOUNDATION COLLEGE INC.

August 2022 - May 2026

Bachelor of Science in Information System

Pioneer Avenue, General Santos City
